

Wellness Tips

Developmental Ages and Possible Reactions to Death

AGE	THINK	FEEL	Do
3-5 years (preschool)	 Death is temporary and reversible Finality of death is not evident Death mixed up with trips, sleep May wonder what deceased is doing 	 Sad Anxious Withdrawn Confused about changes Angry Scared Cranky (feelings are acted out in play) 	 Cry Fight Are interested in dead things Act as if death never happened
6-9 years	 About the finality of death About biological process of death Death is related to mutilation A spirit gets you when you die About who will care for them if a parent dies Their actions and words caused the death 	 Sad Anxious Withdrawn Confused about changes Angry Scared Cranky (feelings are acted out in play) 	 Behave aggressively Behave withdrawn Experience nightmares Act as if death never happened Lack concentration Have a decline in grades
9-12 years	 About and understand the finality of death Death is hard to talk about That death may happen again, and feel anxious About death with jocularity About what will happen if their parent(s) die Their actions and words caused the death 	 Vulnerable Anxious Scared Lonely Confused Angry Sad Abandoned Guilty Fearful Worried Isolated 	 Behave aggressively Behave withdrawn Talk about the Physical aspects of death Act like it never happened, not show feelings Experience Nightmares Lack concentration Have a decline in grades
12 years and up (teenagers)	 About and understand the finality of death If they show their feelings they will be weak They need to be in control of their feelings About death with jocularity Only about life before and after death Their actions and words caused the death 	 Vulnerable Anxious Scared Lonely Confused Angry Sad Abandoned Guilty Fearful Worried Isolated 	 Behave Impulsively Argue, scream, fight Allow themselves to be in dangerous situations Grieve for what might have been Experience Nightmares Act like it never happened Lack concentration Have a decline in grades
